

At Grupo Bimbo we are committed to applying good environmental practices to all life cycle steps in each of our products. We have adopted a comprehensive, long-term commitment to assure the efficient utilization of our resources related to the carbon and water footprint, integral residual management, renewable resource usage and continuous improvement, in all aspects of our value chain.

In order to accomplish the above, Grupo Bimbo must:

- Comply with all environmental laws and environmental commitments, as well as their updates, in all the countries where it has operations.
- Act responsibly to conserve the environment, according to its nature and impact level within the value chain.
- Promote continuous improvement through the adoption of an environmental management system based on international standards and guidelines, focused on the most significant aspects.
- Encourage continuous environmental awareness among all its associates to promote understanding of this subject and embed it in their daily activities.
- Collaborate with clients, suppliers and any other interested parties to reduce negative environmental impacts, and participate in local and international forums focused on the development of initiatives related to the environment.
- Promote the research, development and promotion of scientific and technological knowledge to preserve the environment, efficient resource usage, waste reduction and continuous improvement.
